

3.2.P.3.3 Description of Manufacturing Process and Process Controls

AMLOZA (Amlodipine Besylate Tablets, USP) 5 mg / 10 mg — ANDA

1. Dispensing of drug substance and excipients per batch formula. 2. Sifting of drug substance and diluents through appropriate mesh screen. 3. Blending of sifted materials (drug substance, diluents, disintegrant) in a suitable blender for a validated time/speed. 4. Lubrication: addition of magnesium stearate, blended for a shorter, controlled time to avoid over-lubrication. 5. Compression on a rotary tablet press to target weight, hardness, and thickness. 6. Packaging into the proposed container closure system.
