

4.2.1 Pharmacology Study Reports

AMLOZA (Amlodipine Besylate Tablets, USP) 5 mg / 10 mg — ANDA

No new pharmacology study reports are submitted in this Module. This Abbreviated New Drug Application (ANDA) relies on the nonclinical data previously reviewed and relied upon by the Food and Drug Administration in support of the approval of the Reference Listed Drug, Norvasc® (amlodipine besylate) Tablets, NDA 019787 (Pfizer Inc.). No independently generated pharmacology, pharmacokinetic, toxicology, genotoxicity, carcinogenicity, or reproductive/developmental toxicity study reports are included in this application. Additional nonclinical studies are not required to support this application, consistent with 21 CFR 314.94(a)(8), as this ANDA proposes the same active ingredient, route of administration, dosage form, and strengths as the RLD, and introduces no novel excipients. See Module 4.2 (Nonclinical Written and Tabulated Summaries) for the full regulatory basis and narrative discussion supporting this position.

ACADEMIC PORTFOLIO EXERCISE — NOT FOR REGULATORY SUBMISSION
